EXPERIENCE

- | | | |
|--|---|------------------------|
| Software Developer | Sematic AB
Linköping, Sweden | Summer 2016 |
| Worked as a software developer in a small team for Sematic AB. Sematic works with scheduling solutions for healthcare and has most of their customers at Linköpings University Hospital. My tasks were to extend their current solution to support several departments and stations at the time. This consisted of javascript development using MeteorJS and fetching/setting data from MongoDB. | | |
| Software Developer | Komplementaskolan AB
Stockholm, Sweden | Summer 2015 |
| Worked as a software development intern at Komplementaskolan AB in Stockholm. Me and another intern worked on some frontend functionality for an admin interface. Learned alot about SOLID-principles and common concepts of software development through weekly code reviews. | | |
| Teaching Assistant | Linköpings University
Norrköping, Sweden | Sep 2014 - Dec 2016 |
| Worked as a teaching assistant in a few courses at the university. The courses i work with are mostly in C++ but i have also done some that involves web programming as well as user interfaces in Android. | | |
| Software Developer | Ericsson
Linköping, Sweden | Summer 2014 |
| Summer internship at Ericsson as a software developer. I worked on a system/concept helping a management team receive a better overview of the current process flows for certain products. The job had a heavy emphasis on working agile and i learned a lot about Ericssons way of working with Lean. | | |
| Programming Mentor | LiTHehack
Norrköping Sweden | Aug 2014 - August 2015 |
| I Helped other students in programming related questions once or twice every week at Linköpings University. I also work as a Lab assistant in computer science courses. | | |
| Salesman | Gorm Larsen Nordic
Karlstad, Sweden | Sep 2011 - March 2012 |
| I was a salesman mainly promoting HP products for Gorm Larsen Nordic. The job included customer service and having a deep knowledge in HP products and understanding what the customers really needed. | | |

COMPUTER SKILLS

Extensive knowledge in information visualization, web development and image processing
Programming skills in C++, Java, OpenGL, Matlab, Rails, EmberJS, MeteorJS
